

JBL PROFLORA CO2 CYLINDER 500 U

Disposable storage cylinder ready-filled with 500g CO2

Suitable for: 

- CO2 storage cylinder for all CO2 systems. Supplies aquarium plants with their main nutrient carbon dioxide (CO2) while preventing algae
- Easy to install: turn the pressure regulator with internal thread onto the external thread (M10x1) of the storage cylinders
- Including mounted rubber stand for good stability. Total height with mounted pressure reducer: 37 cm
- TÜV-tested, recyclable 500 g disposable CO2 steel cylinder (thread M10x1). Because CO2 liquefies under pressure CO2 pressurised gas cylinders must be in an upright position when in operation
- Package contents: disposable cylinder, ready-filled with 500 g CO2, dimensions: 31 x 7.5 cm, thread M10x1

JBL PROFLORA CO2 CYLINDER 500 U

Product information

Disposable or reusable CO2 cylinder? There are 2 different cylinder types: disposable cylinders that are disposed of and recycled after emptying and reusable cylinders that can be refilled again and again. Many pet shops and gas companies can carry out the refilling. If you live in a region where refilling is a problem, the disposable cylinder can be an alternative. Should the refilling situation improve, you can always convert the disposable pressure reducer into a reusable pressure reducer in 2 minutes by unscrewing the adapter (JBL PROFLORA ADAPT U-M). Aquarium owners who live on islands (as an example) are sometimes not allowed to transport filled reusable cylinders by ferry or plane. Disposable cylinders are then sometimes allowed!

The size of the cylinder often depends on the cabinet in which the CO2 storage cylinder is to be placed: A 500 g disposable bottle is only 31 cm high (plus pressure reducer = 37 cm), a 500 g reusable bottle with stand is already 43 cm high and a 2000 g bottle 45.5 cm high. Basically, of course, a larger cylinder is an advantage, because it simply needs to be replaced or refilled less frequently.

TÜV inspection of the CO2 cylinders: All reusable CO2 cylinders must be inspected regularly, every 10 years, by the TÜV (at least in Germany). On the cylinder you will always find - though sometimes badly legibly - the date of the last TÜV inspection and sometimes the year of the next inspection.
