JBL Korall Fluid Product information

Animal welfare is important to us

No processing of cheap fish meal, uses fish meat from fish fillet production with the motto: The large fillet for humans and the small fillet for our aquarium fish! For years JBL has supported the largest international organisation for the protection of sharks "Shark Project".

Fish feeding can be a problem in the holday season. JBL offers food blocks for when you are away. This animal food keeps for a long time and provides for your fish throughout your absence. The food is enclosed in a mineral block and dissolves slowly, thereby releasing the food.

The alternative to this holiday food, for longer absences etc., is an automatic fish feeder (JBL AutoFood).

Ahead through research The results of the JBL research expeditions , combined with the expertise of the JBL research and development team, has resulted in optimal and balanced food mixtures made of high-quality ingredients.

Feeding recommendation 1 food block feeds 25 ornamental fish for 2 weeks. Dispose of the remains of the block after use.
