

JBL Symec VL

Filter wool fleece to remove water cloudiness

Suitable for:

- Fast removal of all types of cloudiness in freshwater and marine aquariums: quality filter wool fleece for aquarium filters
- Easy to use: individual cut of the 3 cm thick fleece mat. Inlay as last filter stage
- Crystal-clear water: filters off all types of cloudiness and particles. Although rinsing is possible we recommend exchanging it instead
- No release of pollutants - water-neutral synthetic fibre
- Contents: 1 pack of filter wool fleece for aquarium filters

Product information

Clean and healthy water

Plant and food remains and metabolic substances lead to a deterioration of the quality of the water in the aquarium. Good water quality is necessary for healthy fish and plants. This can be achieved with various filters and filter materials. The filters suck in the aquarium water and remove the pollution and waste materials with the filter material from the water.

Easy to use

Cut filter floss pad to a size which is about 1 – 2 mm larger than the relevant cross section and put it as the last filter stage into the filter. Avoid gaps between the inner wall and filter. Fine filter material, such as filter wool or filter fleece always needs to be put as last filter material into the external filter so that the filter material, inserted in front of it, can carry out a pre-filtering and the wool wouldn't get clogged too fast. Notice that filter wool is always the finest filtering.

Can be used without fear of side effects

No release of pollutants into the aquarium thanks to neutral microfibre floss.
