

JBL ProFlow t300

Submersible pump with 80-300 l/h for water circulation

Suitable for:   

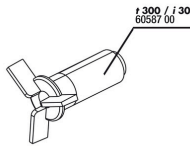

- Clean and healthy water: submersible pump with 80 – 300 l/h output for the water circulation in aquariums and aqua-terrariums. Use for bio filters, indoor fountains or other fountains
- Easy to install: connect hose or pipe with outlet 12/16 to the pump (end piece freely selectable), use in aquarium/aqua-terrarium, connect mains plug
- Only 4 cm water level required: suitable for all bio filters, use as indoor fountain or other fountains, adjustable pump capacity, stainless steel shaft, max. pumping head 0.5 m
- Tested to TÜV, low power consumption of 4 W, completely submersible (IPX8), sturdy mounting due to 3 suction cups
- Package contents: submersible pump for water pumping, dimensions (L/H/W): 36 x 58 mm, incl. 3 suction cups

Product information

Clean and healthy water

Plant and food remains and metabolic substances lead to a deterioration of the quality of the water in the aquarium. Good water quality is necessary for the promotion of health in fish and plants. Water pumps ensure permanent circulation and contribute to the maintenance of clean and healthy water.

Easy to install

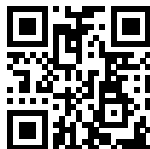

Depending on the situation connect hose or pipe with outlet 16/22 and the desired endpiece to the pump and insert into the aquarium/aqua-terrarium. Connect the power plug.

Versatile use

Thanks to its small size the JBL submersible pump fits in every bio filter and thus can be used as feed pump in clarified water filters. The low minimum water level of 4 cm also makes it an ideal pump in indoor fountains and fountains in aqua-terrariums.

Safe and economical

The submersible pump is tested to TÜV and completely submersible (IPX8). It achieves high output at a low consumption of 4 W. Three suction cups ensure sturdy mounting.
