

JBL AquaPad

Special underlay for aquariums and terrariums

Suitable for:

- Avoids tension in the glass – compensates unevenness under aquariums and inside aquariums when there are rock constructions
- Easy to use: place the AquaPad under the aquarium or inside the aquarium for heavy rock constructions
- Compensates unevenness, prevents heat loss and load piles inside the aquarium caused by heavy stones
- Prevention of glass breakage, stability
- Contents: 1 special underlay for aquariums and terrariums

JBL AquaPad

Product information

XXX

Prevents tension – Compensates unevenness

Every aquarium needs an underlay to prevent unevenness and to protect against tension in the glass.

The JBL AquaPad prevents heat loss and thus promotes plant growth. It provides stability and protects against glass breakage.

Easy to use

Choose the AquaPad corresponding to the size of your aquarium and place it under the aquarium.

Never put aquariums directly on wood or other materials.

In addition JBL AquaPad provides perfect protection for the bottom pane when adding heavy rock constructions to the aquarium.
