Product information

Automatic feeding

JBL's practical automatic feeder is designed for the automatic feeding of aquarium fish. The feeder is suitable for all granulates up to 3 mm. Flakes, tablets and sticks cannot be moved on properly in the screw conveyor.

The automatic feeder is available in white and black.

Feeds up to 4 times a day

The JBL PRONOVO AutoFood can be programmed for up to 4 feeds a day. The feeder has an on/off switch for manual operation. The feeding times and quantity can be easily set on the display. The feeder has an air connection to keep food dry.

Easy mounting

The feeder can be mounted by suction cups or with a sturdy clamp mount. The holder can be rotated through 360 °.

With the help of an included adapter ring, the JBL PRONOVO 250 ml tins also fit on the automatic feeder if the volume is to be increased from 125 ml to 375 ml. Otherwise the food is filled into the feeder - then the format of the tin does not matter.
