Product information

Maximum light output without additional energy costs

An optimal illumination of the aquarium/terrarium is important both for plant and coral growth and also to minimise algae growth. By using reflectors a maximum light output can be achieved – without additional energy costs. In addition they serve as a glare protection while you work in your aquarium.

Holders to attach fluorescent tubes to the reflectors

Attach clip to the lower reflector panel, click clip holder at the upper panel to the clip. Not suitable for fluorescent tubes switched in tandem.
