

JBL StabiloPond Basis

Basic care product for all garden ponds

Suitable for: 

- Natural, biotope-like pond water balance: basic care product to stabilise the KH, GH and pH values in the pond
- To use: Sprinkle mineral powder evenly onto the water surface of the pond. After some slight clouding it dissolves completely and in doing increases the essential mineral content of the pond water
- Life insurance for fish and plants: supplies essential minerals, prevents fluctuations in the water values, activates capacity for self-purification, better growth of microorganisms
- The effectiveness of an anti-algae agent depends on a stabilised pH value
- Contents: basic care product, Stabilo Pond Basis. Dosage: 100 g granulate for 1000 l pond water

Product information

Natural Balance in the Garden Pond

Each season makes different demands on the garden pond. Pruning back plants and using pumps or pond nets help to keep the pond environment healthy.

With a water test you can recognise deficits in the pond water in order to take appropriate measures.

JBL's zero-risk concept

Algae can pollute the pond water and thus cause damage to the fish and the plants in the pond. In collaboration with scientists JBL has developed a concept for a permanent removal of algae.

"1-2-3 algae-free"

Stabilise the water: increase the mineral content for anti-algae agents (JBL StabiloPond) to work more effectively

Combat algae: add a suitable anti-algae agent (JBL AlgoPond) into the water

Limit nutrients: remove the nutrients of dying algae (JBL PhosExPond)

Stabilo Pond Basis is easy to use

Determine the required quantity for the garden pond. Spread the calculated quantity widely over the pond. Use regularly every 6 weeks and after a larger freshwater supply, e.g. after water change or heavy rain falls.

Dosage: 100 g granulate for 1000 l pondwater.
