

JBL PROFLORA CO₂ CALIBRATION SET

To calibrate and store pH electrodes

Suitable for: 

- Professional use of pH electrodes for aquariums: complete set for calibration
- Easy to use: fill calibration solutions into cuvettes. Immerse pH electrode in calibration solutions according to instructions and rinse afterwards
- pH electrodes need to be readjusted (calibrated) every 30 - max. 60 days. To do this, they are immersed in calibration liquids with a given pH value and the device then readjusts itself
- Only 5-10 ml calibration liquid is needed per calibration procedure. Then rinse with distilled water (included in the set)
- Package contents: calibration set for pH electrodes, incl. calibration solution pH 7 and pH 4 (50 ml each), distilled water for rinsing (50 ml), 3 cuvettes

Product information

Healthy fish and plants

The acidity defines the pH value of the water. It needs to be constantly checked then adjusted as necessary to maintain the health of the fish and plants. The right pH value depends on the fish stock of the aquarium. A wrong pH value can cause stress and diseases. Using an electrode, the value can be precisely measured.

Cleaning and care of electrodes

Bacteria, lime and other impurities which settle on the electrode can falsify the real pH value. The regular cleaning and calibration of the electrode ensure precise measurement and an unaltered pH value.

Easy to use

Fill 10 ml of each of the two calibration liquids (pH 7 and pH 4) into cuvettes. Fill the third cuvette with distilled water. Remove the electrode from the aquarium and dry it. Immerse the electrode in the calibration solutions in the order given in the instructions, rinsing each time. The complete set contains all the liquids required for the professional and regular calibration.

Features	
Product name	JBL PROFLORA CO2 CALIBRATION SET
Art. No.	6465200
Animal species	Arowana, Axolotl, Barbels, Bettas, Bichirs/reedfish, Blowfish, Catfish, Cichlids (South America), Crayfish, Danions, Discus, Dwarf shrimps, Flowerhorn, Goldfish, Gouramis, Guppy, Juvenile fish, Killifish, Livebearers, Loaches, Panchaxes, Rainbowfish, Snails, Spiny eels, Tetra, Veiltails, freshwater butterflyfish

Features	
Animal size	For all animal sizes
Animal age group	All aquarium fish
Volume of habitat	For all aquariums
Material	Plastic (PVC) / plastic (PE)
Food type	-
Colour	blue / red / transparent
