

JBL ProFlora Bio80

Bio-CO₂ fertiliser system with mini diffuser

- Natural CO₂ fertilisation for 40 days: healthy plant growth, less algae. Bio-CO₂ starter set for aquariums from 12-80 l
- Simple to install: ready for use within a few minutes
- Natural: CO₂ production from biological fermentation process. High yield: steady production of CO₂ for 40 days due to immediate and long-term buffer system, refillable. Improvement of plant growth of fine-structured plants. Professional CO₂ diffuser
- No pressurised gas cylinder needed, special CO₂ resistant hose
- Package contents: bio-CO₂ fertiliser system, ProFlora bio 80, incl. reaction canister, refill set, CO₂ diffuser, CO₂ hose, check valve

Product information

Nutrition for aquarium plants

Healthy plants are important in every aquarium. Plants provide the aquarium with vital oxygen for the aquarium inhabitants, prevent algae growth and remove problem-causing substances.

Healthy plants = healthy fish

Healthy plants prevent algae growth, supply oxygen, remove pollutants, offer hiding places and reduce pathogens.

For the plants to flourish the following demands need to be met:

Light as an energy source for the photosynthesis of CO₂, nutrients and trace elements to promote growth.

JBL plant fertilisers supply the plants with all their main nutrients and essential trace elements through the water. This way the plants can absorb all the required nutrients they need over the leaves and roots.
