Product information

Maintenance and cleaning
Food and plant remains and metabolic products pollute the aquarium water. By cleaning the tank and accessories and by enacting regular partial water changes, your aquarium creatures will stay happy and you'll get more out of your aquarium.

Clean within minutes
JBL Blanki removes algae, lime and other deposits from the aquarium pane within minutes. The glass pane cleaner does not scratch and with its robust aluminium handle is easy to handle without getting your hands wet.

Safe
The use of JBL Blanki is highly suitable for children. The cleaner is chemically neutral, non-rust and has no blades.
Note: not suitable for plastic panes; keep the sponge cushion free of sand.

What's worth bearing in mind when cleaning your panes?
The glass aquarium panes are, in contrast to the plastic (acrylic/plexiglass) panes, harder than steel. This means they cannot be scratched with blades or metal pads. However, the gravel and sand in the aquarium is harder and can cause scratches if it gets between the cleaner and the glass. So be careful when you're getting close to the ground with the glass cleaner. The silicone seams of your aquarium are also at risk. Avoid damaging the silicone seams with pane cleaning blades. Use a care glove (JBL PROSCAPE CLEANING GLOVE) for cleaning these sensitive areas.
