

JBL PROPOND STAPLE M

All-season food for koi and pond fish from 35-55 cm

Suitable for: 

- High-quality floating pellets with a diameter of 6 mm for all-season feeding at water temperatures of 10-25 °C
- To use: open the seal of the resealable bag and feed as much as the fish eat in a few minutes
- Ideal protein/fat ratio according to NEO index of 4:1 for healthy and disease-resistant fish (32 % protein, 8 % fat, 4 % crude fibre, 8 % crude ash)
- Healthy growth, beautiful colour formation and colour separation thanks to salmon and krill
- Package content: sealed and resealable bags with zipper

JBL PROPOND STAPLE M

Product information

NEO Index® literally means: natural, energy-optimised nutrition. Behind this lies the ratio of proteins to fats in the food. Looking at the season alone, the fish would only need half as much protein in winter (2:1) as in summer (4:1). But because not only the season (which means water temperature), but also the size and age of the fish, and food function (e.g. growth food) play determining roles, the NEO Index® has been developed to deal with all these factors in one.

JBL PROPOND STAPLE is an ideal all-season food for water temperatures between 10 and 25 °C. If the water temperatures fall below 10 °C, a special low-temperature food such as JBL PROPOND WINTER should be used. At water temperatures above 25 °C we recommend you change to a special "high temperature food" such as JBL PROPOND SUMMER.
