

JBL ProFlora u500

Disposable CO2 cylinder 500 g for fertiliser systems

- Replacement of disposable storage cylinders for a wide range of disposable CO2 plant fertiliser systems, such as the JBL ProFlora u systems
- Easy to install: unscrew empty cylinder and screw new cylinder to pressure reducer. Valve opens automatically
- Suitable for all pressure reducers with M 10 x 1 thread
- Height: 29 cm, diameter: 7.5 cm
- Package contents: 1 x disposable cylinder JBL ProFlora u500, ready filled with 500 g CO2

JBL ProFlora u500

Product information

Nutrition for aquarium plants

Healthy plants are important for every aquarium. Plants supply the aquarium with vital oxygen for the aquarium dwellers, prevent algae growth and remove pollutants.

Healthy plants = healthy fish

Healthy plants prevent algae growth, supply oxygen, remove pollutants, provide hiding places and reduce pathogens.

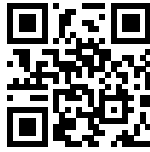

For the plants to flourish the following demands need to be met:

Light as energy source for the photosynthesis

CO₂, nutrients and trace elements as growth promoters.

Nutrition for aquarium plants. Plants provide the aquarium with vital oxygen for the aquarium dwellers, prevent algae growth, remove pollutants, provide hiding places and reduce pathogens.

The CO₂ can be added from disposable cylinders and cartridges and from refillable cylinders or bio-components. The JBL ProFlora m systems contain refillable CO₂ storage cylinders. The JBL ProFlora u systems have disposable cylinders/cartridges and the JBL ProFlora bio-CO₂ systems produce CO₂ from bio-components.
