## Product information

### Clean and healthy water

Plant and food remains and metabolic substances lead to a deterioration of the quality of the water in the aquarium. Good water quality is necessary for healthy fish and plants. This can be achieved with various filters. The filters suck in the aquarium water and remove the pollution and waste materials from the water. Filters also house a lot of bacteria which are beneficial for the aquarium.

### Easy to install

Connect suction pipe to the external filter. Place the suction pipe in the aquarium.
