

# JBL PROFLORA CO2 TAIFUN TUBE

Dedicated CO2-resistant hose for aquariums

Suitable for: 

- For the safe, loss-free conduction of CO2 gas in CO2 fertiliser systems for aquariums
- To use: cut the hose to the correct length before insertion. Always keep hose length as short as possible
- Dedicated CO2-resistant hose, for all standard CO2 systems, colours: black or transparent/white
- Loss-free transport of CO2 gas. Normal air hoses are NOT CO2 gas resistant!
- Package contents: 1 dedicated CO2-resistant hose, length: 3 m, Ø 4/6 mm

# JBL PROFLORA CO2 TAIFUN TUBE

## Product information

### Information on CO2-carrying hoses:

Not every material is suitable for conducting CO2 gas, because while many plastics are suitable for air, they may be permeable to CO2 gas. This is because CO2 has a different diffusion character to air. For this reason air hoses are unsuitable for CO2 systems. The plastic of the JBL PROFLORA CO2 hoses is suitable for CO2 and compatible with all standard CO2 systems.

### Smart laying technique:

Lay the hose connections so that they are as short as possible. The shorter the CO2-carrying hoses, the faster the whole system will react when you increase or decrease the pressure on the fine needle valve. But even with short hoses your settings will always have a delayed reaction. So don't wildly turn the fine needle valve of the pressure reducer: adjust it slightly and wait a little before the bubble count in the bubble counter (PROFLORA CO2 TAIFUN COUNTSAFE) changes.

CO2 hoses also harden over time and should then be replaced.
