Product information

Especially for the nutritional requirements of turtles
Most turtles and terrapins are omnivores. They particularly like to eat fish and water animals. To a lesser extent they like to eat aquatic plants. JBL offers a comprehensive range for the species-appropriate diet for turtles and terrapins, to meet the respective requirements of the animals' size. Dried fish and crustaceans, as well as algae are ranked first.

Other good reasons to feed JBL food
Impressive palatability for turtles and terrapins: practice research including feeds in the wild / using high-value fish protein (no cheap fish meal is used) / no vitamin loss thanks to airtight packaging.

Feeding recommendations
Feed in the water area 2 to 4 times a day as much as will be eaten within approx. 10 minutes.
