Product information

Underwater gardener

Aquascaping is the term used to describe the technique of designing aquarium landscapes. This is the place for plant compositions, for the reproduction of a landscape above water or for natural biotopes. An aquascaping aquarium contains no or few fish and invertebrates.

Pro Scape Tool straight

Long pincers are especially well suited for the insertion of plants. Straight pincers are often used to insert single plants, whereas several plants can be inserted more easily with curved pincers.
