

JBL PROFLORA CO2 ADVANCED BIO SET

Bio-CO2 fertiliser system for freshw. tanks (40-110 l)

Suitable for: 

- Supplies aquarium plants with their main nutrient CO₂, for healthy & vigorous growth while preventing algae
- Easy to assemble: mix the bio-components with water in the reaction canister, connect the hose with the backflow protection and the reactor. Place the reaction canister in the thermal casing – done
- Natural: CO₂ production through biological fermentation process. Economical: 2x40 days of unwavering CO₂ production through an immediate and long-term buffer system. Bio-components can be purchased individually for refilling
- No CO₂ pressurised cylinder necessary. The system works exclusively via a biological process in a high-quality, transparent reaction canister
- Packaging contents: ready-to-connect Bio-CO₂ fertiliser system, incl. reaction canister, thermal casing, 2x bio-components, 3 m special CO₂ hose, suction holder, backflow protection, expandable reactor

JBL PROFLORA CO2 ADVANCED BIO SET

Accessories

JBL PROFLORA CO2 REFILL BIO

Refill set for Bio-CO2 fertiliser systems

JBL PROFLORA CO2 TAIFUN TUBE

Dedicated CO2-resistant hose for aquariums

JBL PROFLORA CO2 TAIFUN SPIRAL 10

Expandable CO2 reactor for freshwater aquariums

JBL PROFLORA CO2 TAIFUN SPIRAL 5

Expandable CO2 reactor for freshwater aquariums

JBL PROFLORA CO2 TAIFUN GLASS

Glass CO2 diffuser for freshwater tanks from 40-300 l

JBL PF CO2 BIO THERMAL CASING adhesive tape

JBL PF CO2 BIO REAKTOR seal

JBL PROFLORA CO2 ADVANCED BIO SET

Spare parts

**JBL Cap Nut Air/CO₂
hose**

**JBL PF CO2 BIO
REAKTOR filter**

**JBL PF CO2 BIO
REAKTOR**

**JBL PF CO2 BIO
THERMAL CASING**

JBL PROFLORA CO2 ADVANCED BIO SET

Product information

Nutrition for aquarium plants

Plants provide the aquarium with vital oxygen for your aquarium inhabitants, prevent algae growth, remove pollutants, provide hiding places and reduce germs. The plant fertiliser system supplies the plants with the main nutrient CO2 through the water. The plants absorb this and convert it into sugar and oxygen in photosynthesis with the help of light.

The difference between Bio-CO2 and pressurised gas cylinder CO2 systems:

Bio-CO2 systems are based on the biological process of yeast fermentation in which CO2 is produced. Here 2 bio-components are made to react in a bottle/reaction vessel. To replenish the system after about 40 days, the reaction bottle/vessel only needs to be refilled with water and the two bio-components.

In the CO2 pressurised gas cylinder system, the CO2 gas is present at about 60 bar in steel pressure cylinders. When they are empty, they can be refilled by a specialist retailer (reusable cylinders, M system) or they are disposable cylinders (U system) which are simply replaced.

It makes no difference to the plants where the CO2 comes from, whether it is from biological or pressurised cylinder systems. They grow much stronger as soon as a CO2 system is installed. The systems are of more concern to the aquarists, who have to decide whether they want disposable cylinders, refillable pressure cylinders or a pressureless bio system.

In addition to CO2 fertilisation, it is important you don't neglect the other components that are necessary for healthy & vigorous growth of the aquarium plants: the right light (e.g. JBL LED SOLAR); sufficient fertilisation with minerals & trace elements (JBL PROFLORA FERROPOL); preferably a root fertilisation for strongly rooting plants with JBL PROFLORA FERROPOL ROOT/ The 7 Balls; the right water temperature (usually between 23 and 26 °C); and the absence of plant-eating fish.

Product details

Article data	
Product name	JBL PROFLORA CO2 ADVANCED BIO SET
Art. No.	6461200
EAN number	4014162646125
EAN as barcode	
-	-
Range	40-110 l
Expiry months	24
RRP incl. VAT	54,34 €
Base price	-
Nominal filling quantity	-
Base quantity	1
Gross weight	1315 g
Net weight	1011 g
Weight change	-

Disposal	
Product name	JBL PROFLORA CO2 ADVANCED BIO SET
Art. No.	6461200

Plastic large	-
Disposal weight metal	0 g

Features	
Product name	JBL PROFLORA CO2 ADVANCED BIO SET
Art. No.	6461200
Animal species	Arowana, Axolotl, Barbels, Bettas, Bichirs/reedfish, Blowfish, Catfish, Cichlids (South America), Crayfish, Danions, Discus, Dwarf shrimps, Flowerhorn, Goldfish, Gouramis, Guppy, Juvenile fish, Killifish, Livebearers, Loaches, Panchaxes, Rainbowfish, Snails, Spiny eels, Tetra, Veiltails, freshwater butterflyfish

Features	
Animal size	For all animal sizes
Animal age group	All aquarium fish
Volume of habitat	40-110 l
Material	Plastic, nutrient mixture, yeast
Food type	-
Colour	transparent / black
Dosage	see instruction manual
Transport conditions	-
