

JBL ReptilJungle UV Light

Energy-saving lamp for rainforest terrariums

Suitable for:

- Terrarium lamp with medium UV for tropical terrariums and 6500 Kelvin for conditions modelled on nature
- For a species-specific care of animals from the tropics and subtropics, such as chameleons and snakes
- Wide reaching UV supply: facilitates activity, appetite and reproductive behaviour with UV-A, ideal calcium metabolism thanks to UV-B
- Recommended distance to the animal: 5 to 20 cm with a daily irradiation time of 8-10 hours
- Package contents: terrarium lamp, ReptilJungle

Product information

Nature as a model

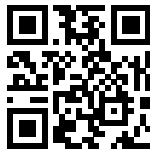

Terrarium animals are cold-blooded animals, which are strongly dependent on light, particularly on the quality and intensity of the light. Activity, food intake, digestion or rest phases are influenced by the change of day and night and the intensity of light. Depending on the light source, there are differences in output and quality of the light.

The right light for your terrarium

The terrarium lamp ReptilJungle is particularly suited for the keeping of animals from the tropics and subtropics, such as chameleons and snakes.

Extensive UV supply

UV-A promotes the activity, the appetite and the species-specific reproductive behaviour. UV-B ensures an optimal calcium metabolism.
