

JBL PROSCAPE K MACROELEMENTS

Potassium plant fertiliser for aquascaping

Suitable for:

- Additional care for plants: supplementary potassium fertiliser for aquascaping aquariums
- Dosing is dependent on intensity of illumination, Co2 supply and consumption.
- Healthy plant growth, prevents potassium deficiency
- Checking of dosage with JBL potassium test
- Package contents: 1 bottle ProScape K Macroelements. Use for e.g. high power light aquariums with CO2: 6 ml/100 l daily, under weak light conditions without CO2: 4 ml/100 l weekly

JBL PROSCAPE K MACROELEMENTS

Product information

Underwater gardener

Aquascaping is the term used to describe the technique of designing aquarium landscapes. This is the place for plant compositions, for the reproduction of a landscape above water or for natural biotopes. An aquascaping aquarium contains no or few fish and invertebrates. This way the nutrient supply for plants is reduced and their growth is limited. Nitrogens, phosphorus and other minerals become scarce substances and need precise re-dosing. The plants need light for their healthy growth in a beautiful underwater landscape, CO2 and the right nutrients.

Please use the dosing calculator at www.proscape.de, to determine the exact fertiliser amount by taking into account the initial values of the aquarium water.
