

# JBL TempSet Heat

Install. kit with ceramic bulb holder for heat radiator

Suitable for:

- Protects reptiles from burns at the heat radiator – installation kit with ceramic bulb holder, heat guard and protective mesh for heat lamps
- Best protection: sturdy, heat-resistant special plastic, mesh made of galvanised steel, bottom made of stainless steel
- Young animals cannot enter the mesh due to small mesh size and narrow slits
- Distance of at least 50 cm from pets and burnable substrates
- Package contents: heat radiator, TempSet Heat, incl. cable with plug, socket E27, quick connector, strain relief bushing, metal plate with strain relief, hang-up hook, threaded screws, threaded screws with nuts

## Product information

### Modelled on nature

Terrarium animals are cold-blooded animals, which are strongly dependent on light, particularly on the quality and intensity of the light. Activity, food intake, digestion or rest phases are influenced by the change of day and night. Depending on the light source, there are differences in output and quality of the light.

### Protection against burns

The protective cage protects the animals against burns from the heat radiator. It is made of sturdy, heat-resistant plastic. It is impossible for young animals to penetrate the fine mesh and narrow slits to burn themselves.
