

JBL SOLAR MARIN DAY

T8 daylight tube for marine aquariums

Suitable for: 

- Fluorescent tube to promote the ideal growth of corals and other invertebrates in marine aquariums
- Easy to install: insert fluorescent T8 tube socket into the fixture and turn until the tube locks into place
- Ideal colour temperature for corals and invertebrates: 15000 Kelvin - cold-white light, high light output, good colour rendering properties
- Excellent illumination from high lumen output. Scientifically tested by IFM Geomar: full spectrum similar to sunlight
- Colour rendering and spectrum are guaranteed for 2 years. Includes reminder label for replacement

JBL SOLAR MARIN DAY

Product information

Light as energy source

Most corals in aquariums need sufficient light. They often feed from the metabolic products of the algae, which live in their tissue. Corals which don't feed photosynthetically prefer dark places and need to be fed with phyto and zooplankton (JBL KorallFluid, JBL PlanktonPur). To ensure ideal growth it is important to know and to reproduce the light requirements of the individual corals in the marine tank.

Easy to install

Insert the fluorescent T8 tube socket into the fixture and turn until the tube locks into place.

Modelled on nature

With its light colour and its spectral distribution of the light the 15000 K tube meets the needs of the corals and invertebrates to promote their growth.
