

JBL Catappa XL

Tropical almond leaves for freshwater aquariums

Suitable for: 

- Caring for fish and invertebrates in freshwater aquariums with conditions close to natural living environment
- Natural effect of tropical almond leaves: promotes well-being, vitality and spawning readiness
- Natural water conditioner and mucous membrane protection, comes from the natural habitat of our aquarium dwellers. Promotes well-being, vitality and spawning readiness. Tanning agents have a compressing effect on the mucous membrane and prevent diseases.
- Harvested from the tree, cleaned, smoothed and sun-dried
- Contents: 1 package Catappa XL, 10 leaves, about 23 cm long. To use: 1 leaf/50 – 100 l water: active substances are completely released after 1 – 3 weeks

JBL Catappa XL

Product information

Nature at Home – Home for fish and plants

Fish and invertebrates need to feel as much at home in the aquarium as in the wild Transform your aquarium water into biotope-like water to protect your aquarium dwellers. Clean water – optimal water quality. The natural ingredients of the tropical almond leaves (Catappa) have quite a lot of positive properties for aquarium dwellers, tanning agents amongst others. After 1-2 days the leaves sink to the bottom. After 1-3 week the active substances have been completely released. Then a new leaf can be added. Older leaves can be removed or they can stay in the aquarium as additional feed for sucker catfish and shrimps. Keeps permanently when stored dry.
