Product information

Clean and healthy water

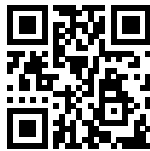

Plant and food remains and metabolic substances lead to a deterioration of the quality of the water in the aquarium. Good water quality is necessary for the promotion of health in fish and plants. Water pumps ensure permanent circulation and contribute to the maintenance of clean and healthy water.

Versatile use

Thanks to its small size the JBL submersible pump fits in every bio filter and thus can be used as feed pump in clarified water filters. The low minimum water level of 4 cm also makes it an ideal pump in indoor fountains and fountains in aqua-terrariums.

Safe and economical

The submersible pump is tested to TÜV and completely submersible (IPX8). It achieves high output at a low consumption of 35 W. Three suction cups ensure sturdy mounting.
