

JBL NovoGranoMix XXS

Granular main food for 1-3 cm small aquarium fish

Suitable for: 

- Perfect, complete nutrition for small fish, such as neon tetras, mini fish, dwarf rasboras and other fish between 1 and 3 cm in length
- To use: Open the seal of the tin and feed as much as the fish can eat in a few minutes. Suitable for fish of all water layers, as the mini granulate floats and slowly sinks
- No water cloudiness and very good acceptance by fish due to high-quality ingredients such as shrimps and algae
- Strong and healthy fish growth with minimum water pollution through naturally balanced protein/fat ratio and omega-3 fatty acids
- Package contents: sealed and resealable tin

Product information

Animal welfare is important to us

No processing of cheap fish meal, we use fish meat from fish fillet production following the motto: the large fillet for humans and the small fillet for our aquarium fish!

For years JBL has supported the largest international organisation for the protection of sharks "Shark Project".

Other good reasons to use JBL fish food:

The use of pure fish protein without cheap fish meal.

Optimal protein/fat ratio.

Mainly proteins from water animals.

Reduction of algae growth and optimal fish growth thanks to adapted phosphate content.

Impressive acceptance on the part of fish: research expeditions with fish feeding trials in the wild.

Minimum vitamin loss due to airtight sealed packaging.

Ahead through research

The results of the JBL research expeditions, combined with the expertise of the JBL research and development team, has resulted in optimal and balanced food mixtures made of high-quality ingredients.

Feeding recommendation

Feed 1 – 2 times a day, as much as can be eaten within a few minutes. Feed young, growing fish 3 – 4 times a day in the same way.

Unopened the food tins can be kept for 3 years, after opening use up within 4 months, since the valuable vitamins will degrade. Choose the size of the tin (100 ml, 250 ml, 1 l, 5.5 l, 10.5 l) in accordance with the monthly consumption stated above and the number of the fish in your aquarium. Available separately to complement main food: supplementary food and treats.
