

JBL NovoBea

Complete food for small aquarium fish and fry

Suitable for: 

- Complete nutrition and ideal growth for small fish species and fry: 52 natural raw nutrients in 7 food flakes
- Nutritious and easy to digest: ideal feeding conditions for small aquarium fish species and young fish of 1 to 5 cm in medium and upper water layer
- Keine Wassertrübung: Reduziertes Algenwachstum durch abgestimmten Phosphatgehalt, bessere Wasserqualität durch bessere Verdaulichkeit des Futters, wodurch die Ausscheidungen der Fische reduziert werden
- Fish choose JBL food: 98.5% of all fish species ate the JBL food immediately during research expeditions in freshwaters. No processing of cheap fish meal, fish meat from fish fillet production for humans is used
- Contents: main food, for small aquarium fish species and fry. After opening use up within 4 months. Unopened can be stored for 3 years in high-quality packaging with foil seal.

Product information

Animal welfare is important to us

No processing of cheap fish meal, uses fish meat from fish fillet production with the motto: The large fillet for humans and the small fillet for our aquarium fish.

For years JBL has supported the largest international organisation for the protection of sharks "Shark Project".

Other good reasons to use JBL fish food:

- The use of pure fish protein without cheap fish meal
- Optimal protein/fat ratio
- Mainly proteins from water animals
- Reduction of algae growth and optimum fish growth thanks to adapted phosphate content
- Impressive acceptance on the part of fish: research expeditions with fish feeding trials in the wild
- Very slight vitamin loss due to airtight sealed packaging

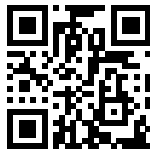

Ahead through research

The results of the JBL research expeditions, combined with the expertise of the JBL research and development team, has resulted in optimal and balanced food mixtures made of high-quality ingredients.

Feeding recommendation

Feed young, growing fish 3 -5 times a day, as much as can be eaten within a few minutes. Adult mini fish species 1-2 times a day in the same way.

Unopened the food tins can be kept for 3 years, after opening use up within 4 months, since valuable vitamins will deteriorate. Choose the size of the tin (100 ml, 250 ml, 1 l, 5.5 l, 10.5 l) in accordance with the monthly consumption stated above and the number of the fish in the aquarium. Complements complete food and available separately: supplementary food and treats.
