

JBL PROTERRA PESCARUS

NEW

Fish treats for terrapin & water turtles

Suitable for: 

- Gently dried whole fish & shrimps provide valuable nutrients, just like in the wild. Food size: shrimps approx. 3 cm, fish up to approx. 9 cm
- The ideal, species-appropriate and energy-rich supplement to other foods, e.g. JBL PROTERRA CRUSTARUS. The dried fish & shrimps float on the water surface
- JBL Expeditions show: fish are the main diet for most aquatic turtle species and, in addition to protein, also provide a high proportion of important phosphorus and calcium
- No artificial colours or preservatives added. Tins, lids, sealing film and label 100 % recyclable
- Package contents: 1 freshly sealed waterproof and lightproof tin/bucket, containing dried fish and shrimps. With dosing aid in lid

JBL PROTERRA PESCARUS

Product information

Especially for the nutritional requirements of turtles Most aquatic and terrapin turtles are omnivores. They particularly like to eat fish, other aquatic animals, such as crayfish, molluscs, insects and often also aquatic plants. JBL offers a comprehensive range for the species-appropriate diet for turtles, to meet the respective requirements of the animals' size. Dried fish, crustaceans, molluscs and insects are most important and constitute a species-appropriate, natural diet.

Other good reasons to feed JBL food

Impressive palatability for turtles: Practical research including feeds in the wild. No vitamin loss thanks to airtight packaging. The JBL food tins and buckets are 100 % recyclable, as the tin, sealing film, label and lid are made from one PP mono-material. There is no need to separate the label from the tin, as is actually necessary with other food tins. The thickness of the plastic has also been reduced, as very high-quality PP (polypropylene) is used. The use of polypropylene ensures full recyclability at the end of the product life cycle. The recycled material is used for the production of new products and thus the spread of pollutants in the environment is minimised.

Turtle species for which this food is ideal (examples):

- Cooter turtles (all species)
- Red-bellied short-necked turtle
- Mud turtles
- Painted turtles
- Softshell turtles
- Musk turtles
- Spotted turtle
- Wood turtles
- Terrapins
- Map turtles
- Chinese three-keeled pond turtle

JBL expeditions often visit turtle habitats, be it in the deserts or, even more frequently, in the wetlands of the tropics. The observations of their way of life and eating habits are incorporated into the development of the JBL foods. This information directly from the wild is extremely valuable, as it would otherwise hardly be available.

The aim should always be to care for the animals in a species-appropriate way and ideally to provide for offspring in order to reduce the removal of species from the wild. Although breeding is not absolutely necessary for some species, as the species relevant to the trade come from offspring or are not endangered, JBL nevertheless considers it desirable to breed pets.
