

# JBL Algal

Anti-algae agent to combat algae

Suitable for:

- For beautiful freshwater aquariums: combats all algae species (even green water = floating algae) intensively
- Application best in the morning (low pH). A partial water change of 30 % is recommended before use. Ensure there is sufficient oxygen content by aerating during the treatment. Repeat after 5 days if necessary
- Combats all types of algae in freshwater aquariums. Without copper!
- Not harmful to fish and microorganisms when used correctly
- Contents: 1 bottle Algal. To use: 10 ml/40 l water. Example with 60 l aquarium: 15 ml

# JBL AlgoI

## Product information

Appropriate and long-term algae control:

Excessive algae growth always occurs when there are too many nutrients (phosphates and nitrates) in the water. That's why long-term algae control always works in two steps: it combats algae with the anti-algae agent JBL AlgoI, then in step 2 it safely binds the nutrients. JBL PhosEx ultra is ideal for this purpose. Adding algae-eating animals, such as sucker catfish, shrimps and snails can also be a great help.
