## Product information

### Hoses for the aquarium:

The operation of an aquarium frequently requires the use of different hoses. JBL provides aquarium hoses in premium quality and in different sizes and colours.

### Premium quality:

The JBL air and water hoses are free of heavy metals. They are made of high-quality material and come with a card for hanging up or on an environmentally friendly cardboard reel (for retailers and breeders)

### Tip for use:

Hoses can sometimes go awry: they become slightly bent or lose their shape. Put the hose in hot water for 20 minutes. The hose will then be much more flexible and kink-free

### For CO2 systems:

Most plastics are permeable to the gas CO2. For this reason dedicated CO2-resistant hoses are available for CO2 systems, e.g. JBL PROFLORA CO2 TAIFUN TUBE in black or transparent

### Environmentally friendly:

Instead of plastic spools, we now use a cardboard core which can be disposed of as 100% paper waste or reused! The large inner diameter prevents the coiled hose from kinking.
