

JBL ProFlora Adapt u-m

Change over from a disposable to a refillable cylinder system

- Problem-free change over from disposable to refillable cylinders
- Quick and easy installation: screw adapter onto pressure reducer, finished!
- The conversion can be reversed at any time.
- Suitable for CO2 pressure reducer JBL u001
- Package contents: adapter, ProFlora Adapt u-m. Connection M10 x 1

JBL ProFlora Adapt u-m

Product information

Ideal nutrition for plants

Carbon dioxide serves as the main nutrient for plants and thus promotes their ideal growth. Plants use CO₂ for photosynthesis and thus supply the water with essential oxygen. They prevent algae growth, remove pollutants, offer hiding places and reduce pathogens.

The correct amount of CO₂ varies from aquarium to aquarium and depends on the volume, the water movement and the planting of the aquarium. With the JBL pressure reducer a precise dosage of CO₂ is possible.

Easy to install

By using a size 6 Allen key (not included) the adapter can be screwed into the JBL pressure reducer. The conversion can be reversed at any time.
