

JBL TempProtect II light

Reptile thermal burn protection for JBL TempSet items

Suitable for:  

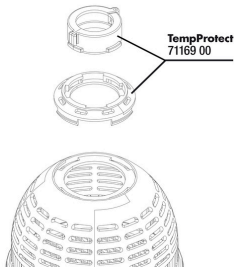

- Safety for reptiles in terrariums: lamp screen made of dimensionally stable special plastic LCP (Liquid Crystal Polymer), heat-resistant up to 290°C
- Installation: unscrew adapter, put it around socket of JBL TempSet, screw adapter in again together with Tempset
- Prevents overheating & reduction of the bulb's operational lifespan. Suitable for: UV spotlights, metal-halide lamps and other lamps
- Extremely safe: narrow slits and fine mesh prevent young animals from entering and burning themselves
- Contains: protective basket complete with metal mesh cover and bayonet for JBL TempSet (not included), screw driver

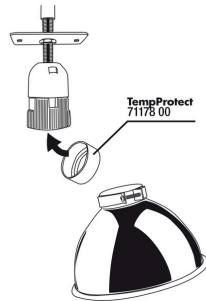

JBL TempProtect II light

Product information

Modelled on nature

Terrarium animals are cold-blooded animals, highly dependent on light, especially on the quality and intensity of the light. Activity, food intake, digestion or rest phases are influenced by the change of day and night and the intensity of light. Depending on the light source, there are differences in output and quality of the light.

Protect your animals

UV spotlights, metal-halide lamps and other lamps get very hot. JBL TempProtect light II protects your animals from burns. As well as protecting the animals the screen prevents the lamp from overheating and thus extends its service life.

Optimal safety

The narrow slits in the screen and the fine mesh width prevent young animals from entering and burning themselves.
