

# JBL PROFLORA Ferropol Tabs

Plant fertiliser for freshwater aquariums

Suitable for:

- Primary care for vigorous plant growth: fertiliser tablets for freshwater aquariums
- Vigorous plant growth, no deficiency symptoms thanks to minerals such as iron, potassium and other trace elements
- Optimal, intensive leaf colouring thanks to ideal iron concentration
- Optimal promotion of plant growth means less algae growth. No phosphates and nitrates
- Package contents: 1 packet FerroTabs, 30 tablets. Use: 1 tablet/25 l water for initial dosage and 1 tablet/50l water for redosage every week

## Product information

### Nutrition for aquarium plants

Healthy plants prevent algae growth. Healthy plants prevent algae growth, supply oxygen, remove pollutants, offer hiding places and reduce pathogens.

### Healthy plants = healthy fish

For the plants to flourish the the following demands have to be met:

Light as an energy source for CO2 photosynthesis, nutrients and trace elements as growth promoters.

JBL fertilisers supply the plants with all main nutrients and essential trace elements. This way the plants can absorb all the required nutrients they need over the leaves and roots, and deficiency symptoms (e. g. iron deficiency) are thus prevented
