

JBL Testlab

Test case with 13 tests f. freshwater analysis Testlab

Suitable for:

- Monitors water values in aquariums simply and reliably. Determines: pH value (3 ranges), carbonate hardness, general hardness, phosphate, nitrite, nitrate, iron, copper, silicate, oxygen and ammonium/ammonia, as well as CO2 calculation using a table
- Add reagents to water samples, compare with colour charts, read values and look up on protocol sheet if and what action is recommended
- Laboratory comparator system to compensate the inherent water colouring, analysis record sheet, instructions for problem solving, CO2 table
- Child-proof reagent bottles, water-proof plastic case, refillable kit
- Package contents: 1 test case for freshwater aquariums. Incl. 13 tests, 6 glass vials, 2 syringes, 3 dosing spoons, thermometer, comparator block, 2 plastic cuvettes, colour charts, CO2 table, ball pen, analysis record sheets, instructions

Product information

Healthy aquariums with conditions close to nature

The right water values are dependent on the fish stock and plants in the aquarium. Even if the water looks clear it can be contaminated. With poor values diseases or algae can appear in the aquarium. To maintain a healthy aquarium with conditions close to nature it is important to check and adapt the water values regularly. With the JBL Testlab you can determine the 12 most important water values in your aquarium.

Precise measurement of the following values:

pH test: acidity of the water from 3.0 to 10

pH-Test: acidity of the water from 6.0 to 7.6

pH-Test: acidity of the water from 7.4 to 9.0

O₂ test: determination of the oxygen content

CO₂ test: determination of the carbon dioxide content for thriving plant growth

GH test: determination of the general hardness

KH test: pH stability of the water (carbonate hardness)

PO₄ test: determination of the phosphate content (reason for algae growth and plant nutrient)

NH₄ / NH₃ test: indication of non-toxic ammonium, determination of the toxic ammonia using table

NO₂ test: determination of the nitrogen compound nitrite, which is toxic for the fish

NO₃ test: determination of the nitrate content (reason for algae growth and plant nutrient)

Fe test: determination of the iron content to monitor the fertilisation

Cu test: deadly heavy metal for invertebrates. Also important for setting the therapeutic dose of medications

SiO₂ test: determination of the silicate content (silicic acid) as the cause of algae growth

To determine the CO₂ content you just need to measure the pH and KH values. From both values arises the CO₂ content in the water, which then can be referenced from the enclosed table.

With our research department and our worldwide expeditions into the habitats of the animals JBL permanently sets new standards with its product innovations.

You can analyse your measured water values in the JBL Online Laboratory free of charge and receive recommendations.

Safety information

- safety information in accordance with GHS	
Signal word	Danger
Hazard symbol	
Risk phrase	<p>EUH206: Warning! Do not use together with other products. May release dangerous gases (chlorine). H225: Highly flammable liquid and vapour. EUH032: Contact with acids liberates very toxic gas. H412: Harmful to aquatic life with long lasting effects. H400: Very toxic to aquatic life. H335: May cause respiratory irritation. H341: Suspected of causing genetic defects. H317: May cause an allergic skin reaction. H314: Causes severe skin burns and eye damage. H302: Harmful if swallowed. H261: In contact with water releases flammable gases.</p>
safety note	<p>P101: If medical advice is needed, have product container or label at hand. P102: Keep out of reach of children. P103: Read label before use. P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P301+P310a: IF SWALLOWED: Immediately call a POISON CENTER/ doctor. P303+P361+P353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P405: Store locked up. P501a: Dispose of contents/container in accordance with local/regional/national/international regulations.</p>
