

JBL PROTERRA HERBIL

NEW

Complete vegetable food for all tortoises

Suitable for: 

- 56 % herbs provide a healthy and nature-true diet for all tortoise species. The need-based fibre content from the plants ensures healthy digestion and high resistance to disease
- Turtles love the smell of the dried herbs. The balanced mixture of plants, herbs and sticks ensures a species-appropriate and natural diet for the turtles
- The high natural mineral & vitamin content ensures perfect health and healthy shell formation without deformities
- Without the addition of artificial colours and preservatives. Tins, buckets, lids, sealing film and label made of 100 % recyclable PP mono-material.
- Package contents: 1 freshly sealed waterproof and lightproof tin/bucket, containing herbs and green food sticks. With dosing aid in lid

JBL PROTERRA HERBIL

Product information

Treat your tortoises with healthy food

Tortoises are gourmets and certainly won't eat everything. However they do enjoy some foods they shouldn't eat at all. Tomatoes, citrus fruit and flesh are unsuitable. The composition and enrichment with tasty herbs of JBL PROTERRA HERBIL was developed in cooperation with Dr. Petra Kölle at the University in Munich. Acceptance trials clearly showed that turtles clearly differentiate between different foods offered and to some extent have personal preferences for individual foods from the JBL PROTERRA range. Because even if a food is nutritionally perfectly composed it firstly needs to be accepted by the animal! With JBL PROTERRA HERBIL this has been achieved in a truly outstanding way.

With JBL PROTERRA HERBIL your turtles receive an ideal complete food. Of course you can also collect green plant food and herbs to supplement their basic nutrition in summer. The other JBL PROTERRA foods VEGABIL, FRUCTIL and FLORSIL are an ideal and species-appropriate supplement to JBL PROTERRA HERBIL.

Tortoises like variety. Turtle species for which this food is ideal (examples):

- Red-footed tortoise
- Star tortoise
- Leopard tortoise
- Marginated tortoise
- Hermann's tortoise
- Spur-thighed tortoise
- African spurred tortoise
- Four-clawed tortoise

JBL expeditions often visit turtle habitats, be it in the deserts or, even more frequently, in the wetlands of the tropics. The observations of their way of life and eating habits are incorporated into the development of the JBL foods. This information directly from the wild is extremely valuable, as it would otherwise hardly be available.

The aim should always be to care for the animals in a species-appropriate way and ideally to provide for offspring in order to reduce the removal of species from the wild. Although breeding is not absolutely necessary for some species, as the species relevant to the trade come from offspring or are not endangered, JBL nevertheless considers it desirable to breed pets.
