

JBL NovoPrawn CLICK

Granular main food for shrimps

Suitable for: 

- Complete nutrition, ideal growth and vibrant colours for invertebrates: with spirulina algae and nettle
- Nutritious and easy to digest: granulate floats and sinks and thus create ideal feeding conditions for shrimps 2 - 10 cm in size
- No water clouding: reduced algae growth thanks to balanced phosphate content, better water quality due to better digestibility of the food, which reduces fish excrement
- Fish choose JBL food: 98.5% of all fish species ate the JBL food immediately during research expeditions in freshwaters. No processing of cheap fish meal, fish meat from fish fillet production for humans is used
- Contents: main food, for shrimps. After opening use up within 4 months. Unopened can be stored for 3 years in high-quality packaging with foil seal.

Product information

Animal welfare is important to us

No processing of cheap fish meal, uses fish meat from fish fillet production with the motto: The large fillet for humans and the small fillet for our aquarium fish.

For years JBL has supported the largest international organisation for the protection of sharks "Shark Project".

Other good reasons to use JBL fish food:

- The use of pure fish protein without cheap fish meal
- Optimal protein/fat ratio
- Mainly proteins from water animals
- Reduction of algae growth and optimum fish growth thanks to adapted phosphate content
- Impressive acceptance on the part of fish: research expeditions with fish feeding trials in the wild
- Very slight vitamin loss due to airtight sealed packaging

Ahead through research

The results of the JBL research expeditions, combined with the expertise of the JBL research and development team, has resulted in optimal and balanced food mixtures made of high-quality ingredients.

Feeding recommendation

Feed daily 1-2 pearls per animal, depending on their size. Since the pearls are stable up to 24 hours without disintegrating, any uneaten pearls do not pose a danger.

Unopened the food tins can be kept for 3 years, after opening use up within 4 months, since valuable vitamins will deteriorate. Choose the size of the tin (100 ml, 250 ml) in accordance with the above stated monthly consumption and the number of shrimps in the aquarium.

Complements complete food and available separately: supplementary food and treats.
