## Product information

### Modelled on nature

Terrarium animals are cold-blooded animals, which are strongly dependent on light, particularly on the quality and intensity of the light. Activity, food intake, digestion or rest phases are influenced by the change of day and night. Depending on the light source, there are differences in output and quality of the light.

### Safe light source

The installation kit is suitable for the safe operation of energy-saving and incandescent lamps, halogen spot lamps, neodymium spot lamps and UV spot lamps (only in a vertical position). It is made of a dedicated high-tech material with heat resistance up to 270 °C. The installation is easy thanks to its pre-assembled mounting plate, screws and switch.
