JBL PROSCAPE PLANTIS PINS

Plant pegs for the anchoring of aquarium plants

Suitable for:

- **Hold for all plants:** pegs to anchor plants safely in the aquarium substrate until the roots have taken firm hold

- **Easy to use:** clip the peg around the plant root, anchor the root in the substrate

- Unbreakable plastic, for freshwater and saltwater aquariums

- No damage to plants or substrate

- Package contents: 1 x plant pegs in pack of 12, ProScape Plantis

JBL PROSCAPE PLANTIS PINS

Product information

Underwater gardener Aquascaping is the term used to describe the technique of designing aquarium landscapes. This is the place for plant compositions, for the reproduction of a landscape above water or for natural biotopes. An aquascaping aquarium often contains no or few fish and invertebrates.

Safe and gentle hold The JBL ProScape Plantis pegs firmly hold the roots of all plants in place until the plants have taken root. The pegs do not damage the plants or the substrate. They are made of unbreakable plastic and are suitable for freshwater and marine aquariums.
