

JBL FIXOL

Adhesive for background pictures in aquariums and terrariums

Suitable for:    

- Perfect hold without bubbles: non-toxic adhesive for glossy plastic foil backgrounds for aquariums and terrariums
- Complete transparency: no annoying reflections caused by air gaps or unwanted bubbles. As a result the foil backgrounds appear more vivid (3D effect)
- To use: apply adhesive to the outside of the aquarium/terrarium rear pane, position the foil on the outside on rear pane, smooth gently with a scraper
- Not suitable for: foil backgrounds with a matt surface, backgrounds in 3D look, paper foil backgrounds
- Package contents: 1 bottle adhesive Fixol, 50 ml. Incl. scraper

JBL FIXOL

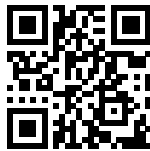

Product information

Species-appropriate environment

Fish need more than plants and caves to feel at home. One way to provide protection is to use a suitable background, which indicates a safe zone in the aquarium. A background is not only welcome for the fish but it is also helpful for hiding unattractive technical items. Give your aquarium more flair and offer your aquarium dwellers a species-appropriate environment.

Use:

Cut the foil background all around one cm smaller than the aquarium or terrarium background. Lay the aquarium/terrarium with the front pane on a stable enough surface. Apply an external cap of JBL Fixol on about the middle of the back glass. Lay pre-cut foil background on top and smooth it with the enclosed spatula from the centre outwards, avoiding bubbles. Wipe off excessive glue with a cloth or tissue paper. Fix background foil all around with transparent adhesive tape. Can be removed with clear water at any time.
