JBL Aquarium Thermometer Digital

Product information

Healthy fish and plants

Fish depend on the right ambient temperature because, being cold-blooded animals, they are not able to adjust their own body temperatures. The vital functions of cold-blooded animals decrease with falling temperatures. The right aquarium temperature is therefore very important to ensure the animals maintain their food intake and guarantee a smooth continuation of all metabolic processes. Depending on the origin of the fish, the temperature they feel comfortable at, varies. With the JBL digital aquarium thermometer you can monitor the temperature.

Precise measurement

The digital aquarium thermometer measures very accurately and can easily be attached to the aquarium pane from the outside.
