

# JBL NanoCrabs

Main food for dwarf crayfish

Suitable for:  

- Complete nutrition and ideal growth of invertebrates: with high cellulose content
- Nutritious and easy to digest: ideal feeding conditions through sinking food wafers for crayfish and crabs from 5 up to 20 cm in size
- Water-stable and trouble-free shedding: wafers do not immediately disintegrate in water. High cellulose content to build up the shell for trouble-free shedding
- No processing of cheap fish meal, fish meat from fish fillet production for humans is used
- Contents: main food, for crayfish in nano aquariums. After opening use up within 4 months. Unopened can be stored for 3 years in high-quality packaging with foil seal

## Product information

Animal welfare is important to us

No processing of cheap fish meal, uses fish meat from fish fillet production with the motto: The large fillet for humans and the small fillet for our aquarium fish.

For years JBL has supported the largest international organisation for the protection of sharks "Shark Project".

Other good reasons to use JBL fish food:

- The use of pure fish protein without cheap fish meal
- Optimal protein/fat ratio
- Mainly proteins from water animals
- Reduction of algae growth and optimum fish growth thanks to adapted phosphate content
- Impressive acceptance on the part of fish: research expeditions with fish feeding trials in the wild
- Very slight vitamin loss due to airtight sealed packaging

Ahead through research

The results of the JBL research expeditions, combined with the expertise of the JBL research and development team, has resulted in optimal and balanced food mixtures made of high-quality ingredients.

Feeding recommendation

Feed 1 – 2 times a day (also at night, if required), as much as can be eaten within approx. 20 minutes.

Unopened the food tins can be kept for 3 years, after opening use up within 4 months, since valuable vitamins will deteriorate.
