

JBL PhosEX Pond Filter

Phosphate remover for pond filters

Suitable for:

- For pond water to suit both fish and plants: granules to reliably remove the algae nutrient phosphate from the pond water
- Easy to use: fill the net bag with granulate, rinse under running water, insert between filter materials of the pond filter (or in special filter media chamber)
- Eliminates the basic nutrients of all types of algae: significant reduction of high phosphate contents (after only 24 hours), effective for about 3 months
- Without any harmful side effects: not dangerous for fish, no release of aluminium, suitable for all standard pond filters with filter media containers
- Package contents: phosphate remover for pond filters, PhosEX Pond Filter, incl. net bag

JBL PhosEX Pond Filter

Product information

Clean pond water – optimal water quality

Water cloudiness can be caused by algae, fish excrements or other wastes. JBL's trouble shooters have been specially created for all types of water cloudiness and treat the pond water without any harmful side effects for the dwellers

JBL's zero-risk concept

Algae can pollute the pond water and thus cause damage to the fish and the plants in the pond. In collaboration with scientists JBL has developed a concept for a permanent removal of algae.

"1-2-3 algae-free"

Stabilise the water: increase the mineral content for anti-algae agents (JBL StabiloPond) to work more effectively

Combat algae: add a suitable anti-algae agent (JBL AlgoPond) into the water

Limit nutrients: remove the nutrients of dying algae (JBL PhosEx Pond)

PhosEx Pond Filter is easy to use

Fill net bag with granules and rinse it under running water. Insert the net bag between the filter materials of the pond filter or into the special filter media chamber.
