- Easy to install: quick coupling - pre-assembled mounting plate, screws and switch.
- Heat and dimension stable to 270 °C
- Package contents: installation kit with connector for lamps in terrariums, TempSet connect

JBL TempSet connect

Product information

Modelled on nature

Terrarium animals are cold-blooded animals, which are strongly dependent on light, particularly on the quality and intensity of the light. Activity, food intake, digestion or rest phases are influenced by the change of day and night. Depending on the light source, there are differences in output and quality of the light.

Safety in the terrarium

The JBL installation kit is suitable for the safe operation of energy-saving and incandescent lamps, halogen spot lamps, neodymium spot lamps, UV spot lamps (only in a vertical position) and ceramic lamps in the terrarium. The kit is heat resistant and keeps its shape up to 270 °C and the switch is suitable for up to 250 W.

Easy to install

TempSet connect is pre-assembled and is equipped with a quick coupling.
