

JBL Testlab ProScape

Test case for water analysis in plant aquariums

Suitable for:

- Simple and reliable monitoring of the water values in aquariums. Determines: pH value, carbonate hardness, CO2-direct, iron, magnesium freshwater, potassium, phosphate, silicate and nitrate
- Add reagents to water samples, compare with colour charts, read values and look up on protocol sheet if and what action is recommended
- Laboratory comparator system to compensate the inherent water colouring, analysis record sheet, instructions for trouble shooting
- Child-proof reagent bottles, water-proof plastic case, refillable kit
- Package contents: 1 test case for planted aquariums. Incl. 9 reagents, 6 glass vials, 2 syringes, 3 dosing spoons, thermometer, comparator block, 2 plastic cuvettes, colour charts, ball pen, analysis record sheets, instructions

Product information

Healthy aquariums with conditions close to nature

The right water values are dependent on the fish stock and the plants in the aquarium. Even if the water looks clear it can be contaminated. With bad values diseases or algae can appear in the aquarium. To maintain a healthy aquarium with conditions close to nature it is important to check and adapt the water values regularly. With the JBL Testlab ProScape you can determine the 9 most important water values in your plant aquarium.

Precise measurement of the following values:

pH test: acidity of the water from 6.0 to 7.6

CO2 Direct: immediate determination of main plant nutrient carbon dioxide (CO2)

KH test: pH stability of the water (carbonate hardness)

Fe test: iron value to control the fertilisation

NO3 test: monitors the plant nutrient nitrate (another possible reason for algae growth)

PO4 test sensitive: determines the phosphate content (another possible reason for algae growth)

SiO2 test: cause of diatoms

Mg test: plant nutrient magnesium

K test: plant nutrient potassium

You can analyse the water values you have measured in the JBL Online Laboratory free of charge and receive recommendations, or have the precise consumption of individual substances in your aquarium individually calculated with the JBL Dosage Calculator. No more following instructions and dosing approximately, in future you can follow the consumption of your aquarium plants and dose precisely!
