## Product information

Especially for the nutritional requirements of turtles

Most turtles and terrapins are omnivores. They particularly like to eat fish and water animals. To a lesser extent they like to eat aquatic plants. JBL offers a comprehensive range for the species-appropriate diet for turtles and terrapins, to meet the respective requirements of the animals' size. Dried fish and crustaceans, as well as algae are ranked first.

Other good reasons to feed JBL food Impressive palatability for turtles and terrapins: practice research including feeds in the wild / using high-value fish protein (no cheap fish meal is used) / no vitamin loss thanks to airtight packaging.

Feeding recommendations

Turtles: young, growing animals: In the water area 2 to 4 times a day 3 to 10 tablets, adult animals: 4 to 5 feeds per week.
