

JBL Floater + AntiKink

Floater with anti-kink protection for PondOxi-Set

Suitable for: 

- Smart accessory for any air stone: floater with anti-kink protection to fix an air hose with an air stone
- Hang air hose with air stone that way into the hose routing that the air stone under water is about 30 cm above the ground.
- No contact with the lower water layers – no complete intermixing of the water
- Firm hold through hose holder, position air stone at desired height.
- Package contents: floater with anti-kink holder to protect hose

Product information

Oxygen supply for every season

Plants and fish need oxygen to survive. In winter and when the water temperatures are high in summer oxygen deficiency can occur in the pond. JBL's aeration set Pond Oxi with floater and air stone prevents oxygen deficiency in the pond.

No intermixing of the water layers

The JBL floater with anti-kink protection has an air hose holder so that the air stone can be positioned at any height. The lower water layers are not touched and a complete intermixing of the water does not occur.

Easy to install:

Put the air hose into the hose holder of the floater and use it to determine the best depth to position the air stone by pushing the hose back and forth.

Tip: Don't attach the stone lower than 30 cm below water surface in winter.
