

JBL PROFLORA pH Control

Measurement and control computer for CO₂/pH values

- Promotes plant growth and leads to lively fish: measurement and control computer for the high-precision calculation and control of the optimal pH value in aquariums
- Easy to mount and to operate: permanent wall mounting with mounting bar – removable. Measurement by means of separately available pH electrode (to be replaced about once a year, not included)
- Digital measurement and control technology: graphic display, direct user interface, separate sensors for pH value and temperature, precision solenoid valve to control the bubble count
- Automatic regulation: detection of the set and the actual pH value. Automatic calculation and supply of the required CO₂ amount. Alarm function
- Package contents: computer ProFlora pH-Control incl. wall mount, power supply unit, temperature sensor, buffer solution pH 7/pH 4, storage/revitalisation solution, distilled water, carbonate hardness test set, calibration cuvettes, 4 year warranty

JBL PROFLORA pH Control

Accessories

JBL Buffer Solution pH 4.0
Calibration solution with pH 4.0 for pH electrodes

JBL Buffer Solution pH 7.0
Calibration solution with pH 7.0 for pH electrodes

JBL Dest
Distilled water to clean pH electrodes

JBL Storage Solution
Cleaning and storage solution for pH electrodes

JBL PROFLORA T3
Special hose for CO₂ systems in aquariums

JBL PROFLORA Cal
Complete kit for calibration

JBL PROFLORA pH Control

Spare parts

JBL tube screw
connection 4/6
pressure reducer

JBL PROFLORA pH Control

Product information

Healthy fish thanks to ideal pH value

The pH value defines the acidity of the water. It needs to be constantly checked and adjusted as necessary to maintain the health of the fish and plants. The correct pH value depends on the fish stock of the aquarium. The wrong pH value can cause stress and diseases.

Technical information:

Precision solenoid valve.

Separate pH value + temperature sensors.

Modern graphic display.

Sensor check during each calibration.

Error diagnosis after failed calibration.

Permanent display: pH actual/set value, sensor voltage, temperature, calibration reminder in days/hours, valve status, precision of measurement.

Set point adjustment: freely selectable or automatic calculation by means of auto pH.

Automatic temperature compensation during measuring and calibration.

Hysteresis freely selectable (upper and lower deviation from switching point).

Password key lock.

Alarm function pH (alarm range).

Alarm function temperature (range and set point alarm).

Selectable valve status.

Language selection: D/BG/F/NL/I/DK/E/P.

Reset function.

Universal power unit suitable for all common mains voltages worldwide. Electrode to be separately purchased to make sure that user always gets a brand-new sensor. The electrode needs to be replaced about once a year.
