# JBL Aquarium Thermometer DigiScan Alarm

Digital aquarium thermometer with alarm function

Suitable for:

■ Digital aquarium thermometer that displays water temperatures from 0-37 ° C in 0.1 ° C increments. Preset alarm flashes below18 and from28 ° C

■ To attach: Insert the battery, remove the protective film and simply stick then press the thermometer onto the outside of the clean aquarium pane. The 4-part velcro sticker makes the thermometer easy to remove at any time

■ Accuracy: +/- 1.0 °C. Battery: 1 x AG10. Size: 5 x 3.5 cm. Digit height: 1.8 cm - easy to read. DO NOT immerse the thermometer in the water!

■ The water temperature is very precisely forwarded through the aquarium pane to the temperature contact on the back of the thermometer

■ Package contents: 1digital aquarium thermometer with alarm function, incl. battery (LR1130) and velcro stickers for attachment

JBL Aquarium Thermometer DigiScan Alarm

Product information

The water temperature in aquariums is of crucial importance for animals and plants and should therefore be monitored. Most tropical ornamental fish are most comfortable at temperatures between 24 and 26 ° C. But there are also fish which prefer lower temperatures. The discus is one of the fish that is happier in higher temperatures between 27 and 29 ° C.
With the help of heater thermostats (JBL ProTemp S) the water temperature can be increased and with coolers (JBL Cooler) it can be lowered.
