Product information

Hoses for the aquarium The operation of an aquarium frequently requires the use of different hoses. JBL provides aquarium hoses in premium quality and in different sizes and colours

Premium quality:

The JBL air and water hoses are free of heavy metals. They are made of high-quality material and come with a card for hanging up or on an environmentally friendly cardboard reel (for retailers and breeders)

Tip for use:

Hoses can sometimes go awry: they become slightly bent or lose their shape. Put the hose in hot water for 20 minutes. The hose will then be much more flexible and kink-free

For CO2 systems:

Most plastics are permeable to the gas CO2. For this reason dedicated CO2-resistant hoses are available for CO2 systems, e.g. JBL PROFLORA CO2 TAIFUN TUBE in black or transparent

Environmentally friendly: Instead of plastic spools, we now use a cardboard core which can be disposed of as 100% paper waste or reused!

The large inner diameter prevents the coiled hose from kinking.
