

# JBL Nano-Catappa

Tropical almond leaves for small freshwater aquariums

Suitable for:

- Natural care for fish and invertebrates in freshwater aquariums
- Natural effect of tropical almond leaves: promotes well-being, vitality and spawning readiness
- Natural water conditioner and protection for mucous membrane from the natural habitat of our aquarium dwellers. Promotes well-being, vitality and spawning readiness. Tanning agents have a compressing effect on the mucous membrane and prevent diseases.
- Directly harvested from the tree, cleaned, smoothed and sun-dried
- Contents: 1 packet Nano-Catappa, 10 leaves, use: 1 leaf/15 – 30 l water. Active substances are released completely after 1 – 3 weeks

## Accessories

### JBL Food Clip

Universal clip for food and salad leaves

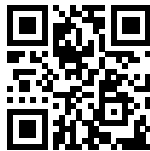

# JBL Nano-Catappa

## Product information

Nature at Home – Home for fish and plants

Fish and invertebrates need to feel as much at home in the aquarium as in the wild. Transform your aquarium water into biotope-like water to protect your aquarium dwellers. Clean water – optimal water quality. The natural ingredients of the tropical almond leaves (Catappa) have quite a lot of positive properties for aquarium dwellers, tanning agents amongst others. After 1-2 days the leaves sink to the bottom. After 1-3 weeks the active substances have been completely released. Then a new leaf can be added. Older leaves can be removed or they can stay in the aquarium as additional feed for sucker catfish and shrimps. Keeps permanently when stored dry.

## Product details

Article data	
Product name	JBL Nano-Catappa
Art. No.	2519900
EAN number	4014162251992
EAN as barcode	
Content	10 piece(s)
Range	300 l
Expiry months	-
RRP incl. VAT	10,35 €
Base price	-
Nominal filling quantity	-
Base quantity	1
Gross weight	40 g
Net weight	14 g
Weight change	1000

Disposal	
Product name	JBL Nano-Catappa
